FUNCTION MEETS DESIGN

LOOP IN CHARGE

Cable management for the modern, organised workplace: design meets efficient charging with LOOP IN CHARGE.

In the dynamic world of the modern office, clean desk solutions have become indispensable. LOOP IN CHARGE fulfils this demand. With its combination of modern design, practical cable management and contemporary technical requirements, the built-in socket with charging function is sure to impress. The modern appearance, supported by robust materials and meticulous finishing, ensures that LOOP IN CHARGE blends seamlessly into any environment.

Various cables can be organised thanks to a generous cable feed-through. If this is not needed, a special rubber cover ensures a clean appearance on the desk.

90 %

of office workers say that a messy workplace has a negative impact on their productivity and mood.

After

More than an all-rounder

LOOP IN CHARGE combines the high-quality design of a furniture socket outlet with functionality and performance. The integrable solution fits perfectly into the standardised 80 mm hole and combines the classic socket outlet with a powerful USB charger. Thanks to the 22W USB charger, fast charging is guaranteed for all end devices.

Whether black or white – LOOP IN CHARGE integrates into any environment and is a statement for the modern office world.
