For connecting a device with USB Type C, Mini DisplayPort or DisplayPort to a display device such as monitors, TVs or beamers with HDMI connection - with resolutions of up to 3840x2160 @60Hz!

- Adapter with three interfaces for maximum flexibility to connect to your MacBook, Ultrabook, NUC or Desktop PC: Mini DisplayPort/ DisplayPort / USB Type C
- HDMI port for connection to the display device of your choice - whether TV, monitor or beamer
- Maximum resolution: 3840x2160 @60Hz
- Best suited for companies offering BYOD (Bring Your Own Device)
- The cable length is about 15cm each

What are the benefits of using Active adapters and converters?

Active products can have a huge advantage when working with long cable runs and video conversion applications. In terms of video converters, active units generally have hardware inside to improve your image.

Note: The DisplayPort adapter only works in one direction - the DisplayPort connector can only be used on the data source side (e.g. graphics card).
