The handy hub with 10m long USB connection cable allows the connection of up to four USB peripherals at a greater distance from the PC. This makes the user almost independent of the location of the devices to be connected (e.g. printer). Power is supplied from the PC via the USB interface, but a power supply unit (5VDC, 3.5A) can also be connected as an option.

This hub with an active repeater cable extends the distance between the hub and the computer up to 10 m.
